

# The new standard for CLIA Waived PCR diagnostics at the point of care

# VELO

- Faster** True PCR with full swab-to-result workflow in 6-10 minutes
- Cheaper** Lowest cost of ownership of any CLIA Waived PoC molecular system
- Simpler** No manual elution, swab inserts directly into the VELO test cartridge

The fully automated sample-to-answer-workflow minimises operator hands-on time and training, enabling you to run the most efficient & cost effective lab in the industry. The initial test is a Flu A/B & SARS-CoV-2 differential diagnostic with the other common respiratory diseases and STIs to follow. VELO is priced to enable you to manage payer pressures while preserving patient care.
